Measurements Taken From Lifts In The Same High Rise Council Tower Block

3 Different Sets Taken:

- 10 Trips with Geared Motor - Empty car
- 10 Trips without Green Gem - Empty car
- 10 Trips with Green Gem - Empty car

Nº	Maximum load [Kg]	Capacity	Number of stops	Speed [m/s]	M	Notes
340	600	8	9	1	27	Geared Omron Machine
340	600	8	9	1	27	Gearless Machine
340	600	8	9	1	27	Gearless + Green Gem

Results

- Geared
- Gearless - 15,35% Savings
- Global Green Gem - 45,83% Savings (54,15% Overall)

Conclusions

	Data
Energy consumed – 10 trips Geared	467 Wh
Energy consumed – 10 trips Gearless	396 Wh
Energy consumed – 10 trips Gearless and Green Gem	214 Wh
Total Energy Savings achieved with Green Gem Installed	54.15%

Installation Of The Green Gem Energy Recovery System

- Simple installation.
- Our system saves practically all the energy that normally goes to the braking resistor.
- The save energy depends directly on the mechanical efficiency of the lift.
